

## Architects & Green Star for New Buildings Fact sheet

**Architects are core to our future vision of Green Star. From delivering quality places to ensuring inclusive spaces, the new rating tool brings an increased focus on design decisions that shape our built environment.**

Announced in March 2019, Green Star for New Buildings reimagines the existing rating tool for new buildings and major refurbishments. It aims to deliver a better, more accessible and relevant experience that meets today's challenges.

It's been eight months since we released our initial [consultation paper](#). We received more than 100 written submissions from you about our proposals in that paper. Our [feedback report](#) released in November confirmed that we are on the right track. Now it's time to reveal the detail underpinning our upcoming rating tool.

The new rating tool has an increased focus on recognising the role of design, placemaking and health. It seeks to help you have more engaging and quality conversations with your clients by removing jargon. It also seeks to put people at the center, with new credits addressing health and inclusion, and giving you the opportunity to create even more meaningful places.

We are seeking your views on the proposed credits and on the changes to the certification process. The feedback process closes at the end of February and the draft credits can be found on our [website](#).

**We have also released a [summary paper](#) that we encourage you to read first.**

The changes to Green Star are significant. This fact sheet shows you the credits we believe are of interest to you. It may not be a comprehensive list and there may be others that you are keen to see as well. However, we strongly believe these are critical to you and your profession.

We encourage you to provide us with feedback on our new rating tool. This is your chance to shape the future of Australia's built environment.

"Architects shape cities. The work you do has an impact long after the building is finished. Green Star for New Buildings acknowledges this and ensures that design decisions are put front and center. We can't wait to see the built environment that you will deliver."

**Nick Alsop**  
Senior Manager Market Engagement

### What you should do:

- 1 Read the summary paper
- 2 Explore the credits highlighted below
- 3 Provide us with your feedback

# Why are we changing Green Star?

## Global megatrends are shaping the built environment like never before.

Climate action, resource efficiency and health & wellbeing are at the top of issues to address. Issues related to these, such as resilience, biodiversity and nature losses, and a stronger focus on social impacts are rising in importance.

**Green Star for New Buildings rises to the challenge.**

## The seven megatrends underpinning Green Star for New Buildings:

- 1 **Carbon emissions** and energy use
- 2 **Resilience** against climate change and other shocks and stresses
- 3 **Water consumption** during operations and construction
- 4 **Nature** and our part in restoring the planet's biodiversity.
- 5 **Circular economy** and the trend to close the loop on the supply chain.
- 6 **Health and wellbeing** for all occupants
- 7 **People**, human rights, and the inclusion of all in green buildings

# Fact sheet: Architects

Green Star for New Buildings is a significant evolution to Green Star. We encourage you to review the following credits first, as they are likely to impact you or benefit you directly.

## Responsible

- Industry development
- Responsible construction
- Operational waste
- Verification and handover
- Responsible procurement
- Responsible structure
- Responsible envelope
- Responsible systems
- Responsible finishes

## Healthy

- Clean air
- Light quality
- Exposure to toxins
- Acoustic quality
- Amenity and comfort
- Human connection to nature

## Resilient

- Climate change resilience
- Systems resilience
- Community resilience
- Grid optimisation

## Positive

- Energy use
- Energy source
- Upfront carbon emissions
- Other carbon emissions
- Tenant emissions
- Impacts from resources
- Water use

## Places

- People movement
- Activated places
- Goods movement
- Enjoyable places
- Access to amenity
- Contribution to place

## People

- Community engagement
- Culture, Identify and heritage
- Design for diversity
- Design quality
- Privacy
- Social construction impacts
- Social procurement

## Nature

- Impacts to Nature
- Biodiversity Enhancement
- Nature Connectivity
- Nature Stewardship
- Offsite Restoration
- Waterways protection

## Leadership

- Innovation Challenges
- Leadership in Sustainability

# There are more things to come

- **Provide your feedback** to the [digitisation and certification paper changes](#) and the [draft credits](#).
- **Attend one or all of our webinars** and be prepared for the new rating tool
- **Join our Early Access Program.** There is still an opportunity to help influence the development of the rating system and be one of the first to use the new rating tool. Contact [FutureFocus@gbca.org.au](mailto:FutureFocus@gbca.org.au) to arrange.
- **Request a briefing for your staff.** GBCA member organisations can request for a member of the Market Transformation team to brief your team. Contact [FutureFocus@gbca.org.au](mailto:FutureFocus@gbca.org.au) to arrange.
- **Make sure you're signed up** to receive our *Green Building Voice* newsletter and *Inside Green Star* newsletter for regular announcements on project consultation periods, progress updates and additional opportunities to get involved.
- **Follow our progress via our website.** We're keen to share our work with you so we'll be providing regular updates, feedback reports, surveys and more on the [GBCA website](#).
- **Partner with us.** We aim to redefine world leadership and best practice for the next decade. Partnership opportunities are available. If you are interested please let us know at: [Lucy.Harris@gbca.org.au](mailto:Lucy.Harris@gbca.org.au)
